Two requirements for a usable photo

01. —
You're smiling!

02. —
You're holding an acoustic guitar

3 Tips for Better Results

A. Framing

Zoom in so we can see you from the waist up. Make sure we can see your whole guitar and that your head and arms aren't cut off on the top or sides.

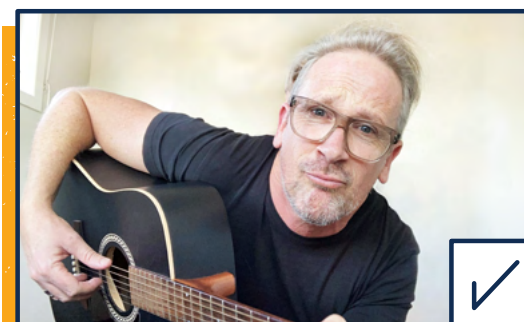

A plain and clear background is best.

B. Lighting

Make sure your light is in front or to the side of your face. Avoid windows and lights behind you. Day and natural light is always the best choice.

Look at the camera and leave space around you and your guitar.

C. Resolution

Make sure your photo is at least 1200 pixels wide but under 5MB file size. If your photo is too big, use this tool to resize your photo, before uploading.
